

# Used Cars Ireland, Car Parts & Accessories @ FunkyMotors.ie

[FunkyMotors.ie](http://FunkyMotors.ie) T/A Besecure2000, based in Dublin Ireland, have launched a new website totally dedicated to the Irish Motor Industry.

The website includes:

## 1. Online Car Parts & Accesories

The idea is to bring together a large variety of car products from as many businesses from Ireland, N. Ireland & UK, giving the customers a wider selection of products at the best possible price.

This is possible due to the fact that one particular product can be sold by many businesses at the same time but each one will have it's own individual price.

Some of the products that can be found on our website are: Car Audio, Car Video, Body kits, Alloy Wheels, Tyres (New & Secondhand), Wind Deflectors, Performance Car Parts, OEM Parts (New),etc.

## 2. Used Cars for Sale – Private and Garages from Ireland

FunkyMotors.ie launches their online [used cars for sale](#) section.

The aim is to create a less costly and hassle free way of Internet advertising, therefore the website is FREE for Private Sellers (up to 3 cars per year), while garages can avail of our brilliant dealer package at an unbelievable price of just **100 Euro per year**.

We also made it possible for the car sale section to be **translated into 12 languages** taking into consideration the **growing multinational Ireland**.

## How can this be possible?

The reason is because internet has become less costly, and we always believe in creating a strong and durable C2B (customer to business) and B2B (business to business) relationship.

## 3. Motoring News, Tips and Advice, Blog

We like to keep up to date and give users everything we can, including the latest motoring news, tips and advice so there will always be something new to entertain them.
